

TECHNICAL FILTER DATA

FILTER REFERENCE GUIDE

The filter reference guide below can help you understand all the components and meanings of Lawrence Factor's® filter numbering system.

CARTRIDGE NUMBER

X10248

X-pendable Brand

Filter Style

Chemical Formula

Length Designation

SOME COMMON FORMULAS

CHEMICAL SYMBOLS

- AA = Activated Alumina
- AC = Activated Carbon
- BX = Blend / MS 13X & Silica Gel
- HOP = Hopcalite or Monoxycon
- 4A = Molecular Sieves 4A
- 13X = Molecular Sieves 13X
- SG = Silica Gel

UNDERSTANDING LAWRENCE FACTORS FILTER NUMBERS

X 65 24 7 vs. X 65 24 0

- **65 - Filter Style**
The same on both filters.
- **24 - Chemical Formula**
The same on both filters.
- **0 vs 7 - Length Designation**
Different on both filters.

Conclusion: Both filters are the same style and the same chemical formula. Since they have different length designations, they are NOT interchangeable.

X 65 24 7 vs. X 65 67 7

- **65 - Filter Style**
The Same on both filters.
- **24 vs 67 - Chemical Formula**
Different on both filters.
- **7 - Length Designation**
The same on both filters.

Conclusion: Both filters are the same style and length. Though they both fit the same tower, the chemical formulas are different. One is a dryer only and the other is a fill purifier.

LENGTH DESIGNATION

- 0 = 10"**
- 5 = 25"**
- 7 = 27"**
- 8 = 18"**
- 9 = 8"**
- 12 = 9"**
- 14 = 14"**
